

The 18th Trends in NanoTechnology International Conference (TNT2018) takes flight in Lecce

Madrid – Nov 30, 2017

Over the past 18 years the Trends in NanoTechnology International Conference (TNT) has been presenting a broad range of research in Nanoscience and Nanotechnology and more than 5200 attendees joined (an average of 300 participants per edition).

The 19th edition will take place in Lecce from the 03th until the 07th of September 2018 and will again have the participation of high level Speakers (Keynotes & Invited).

Lecce is a historic city in southern Italy that hosts several research centers in Nanoscience and Nanotechnology, including the Center for Biomolecular Nanotechnologies (CBN/IIT), where research activities are focused on the areas of environment, health and safety, energy, computation, functionalized materials and robotics.

TNT conference provides an ideal venue for industrial, academic and governmental organizations to share common objectives and drive the commercialization of nanotechnology discoveries.

On the occasion of TNT2018 several symposia will be organized: on Graphene and 2D Materials in collaboration with ICN2 (Spain) and on nanoBioMed in collaboration with CBN/IIT (Italy).

The call for abstracts will close on Monday May 07, 2018 and the early bird registration fee on Friday June 01, 2018 (www.tntconf.org/2018).
