

Title of the workshop: Practical advice on how to write Horizon Europe grant proposals

Short description:

Over the course of two sessions (morning and afternoon), Giles Brandon will give practical advice on how to approach writing grant proposals for Horizon Europe.

- Morning session (09.30 - 12.00): Proposal writing training for “Coordinator and Support Actions (CSA)” for the Horizon Europe Widening programme (Hop-On Facility, Twinning and ERA-Chair)
- Afternoon session (14:00 - 16.30): Proposal writing training for “Research and Innovation Actions (RIA)” for the Horizon Europe Pillar 2 programme (Clusters 4 and 5)

Target audience:

The training is aimed at anyone interested to write grant proposals for Horizon Europe: scientists, research administrators, technologists, entrepreneurs, consultants.

Profile of Giles Brandon:

Giles Brandon (M, 52) is the Managing Director of [Intelligentsia Consultants](#). He has over 20 years' experience of writing grant proposals for European R&D projects. Altogether, he has over 30 years' work experience of R&D and innovation consultancy (CERN, EU, EIB, World Bank and NATO) and high-tech product development (Siemens and Delphi/General Motors). He is the co-inventor of four patents for an electronic control system installed in over one million Renault cars. He has degrees in Physics (BSc, 1st Class), Information Technology (MSc) and Business Administration (MBA, Oxford University).

Intelligentsia Consultants are highly experienced in providing training for proposal writing and project management for EU funded R&D projects. Notably, the company has worked on nearly fifty (50) FP7, H2020 and Horizon Europe projects with many involving research institutes in Widening Countries concerning the development of centres of excellence, integration into ERA, and technology transfer, especially in the fields of OLEDs, physics, materials and ICT (e.g. H2020 HyperOLED, H2020 PHEBE and H20202 MEGA).
